

## CERVICAL CARCINOMA HISTOPATHOLOGY REPORT

Name:..... Hospital i.d / No. Laboratory Accession No. / Report No.....
---

### GROSS DESCRIPTION

Specimen type: .....

The uterus with cervix measures \_\_\_\_ X \_\_\_\_ X \_\_\_\_ cm.

Cervix measures – Ectocervix diameter  
Depth of specimen

Vaginal cuff - Not present / present.

Minimum length .....mm

Maximum length .....mm

Tumour location –

Ectocervix - anterior lip/ posterior Lip/ circumferential / Right lateral / Left lateral

Endocervix – anterior / posterior/ right lateral / left lateral / circumferential

Vagina

Uterus : LUS / Corpus

Tumour Dimensions: -----x-----mm

Description-ulceroproliferative/ infiltrative

Depth of invasion:.....mm stromal invasion present / Not able to assess / the tumour invades less than / more than half the thickness of the cervical stroma.

Vagina: Not involved / involved.

The tumour free cervical adventitial margin is \_\_\_\_ cm.

Endometrium: measures \_\_\_\_ mm in thickness and is \_\_\_\_\_

Myometrium measures \_\_\_\_ cm in thickness and is \_\_\_\_\_

Right ovary measures \_\_\_\_ X \_\_\_\_ X \_\_\_\_ cm and is \_\_\_\_\_

Right fallopian tube is \_\_\_\_ cm long and is \_\_\_\_\_

Left ovary measures \_\_\_\_ X \_\_\_\_ X \_\_\_\_ cm and is \_\_\_\_\_

Left fallopian tube is \_\_\_\_ cm long and is \_\_\_\_\_

Right parametrium measures \_\_\_\_ X \_\_\_\_ X \_\_\_\_ cm and is not involved / involved.

Left parametrium measures \_\_\_\_ X \_\_\_\_ X \_\_\_\_ cm and is not involved / involved.

Lymph nodes: Sentinel

Rt. Pelvic

Lt Pelvic

Sections Key:

**HISTOLOGY**

Specimen:

Tumour type (as per WHO)

Tumour Description- Optional

Tumour grade

The tumour invades in the inner half / outer half of the cervical stroma.

Distance of tumour free margin from the cervical adventitia is \_\_\_\_\_ cm.

Lymphovascular Invasion: Not identified / Identified / Indeterminate.

Co-Existent Pathology : Not identified / LSIL / HSIL / AIS / SMILE

Perineurial invasion is seen / not seen.(optional)

Parametrium: Right : Not involved / Involved

Left : Not involved / Involved

The vagina is \_\_\_\_\_

The vaginal cuff / cut margins are \_\_\_\_\_

Co-Existent Pathology : Not identified / LSIL / HSIL / AIS / SMILE

The endometrium is \_\_\_\_\_

The myometrium is \_\_\_\_\_

The right ovary is \_\_\_\_\_

The right fallopian tube is \_\_\_\_\_

The left ovary is \_\_\_\_\_

The left fallopian tube is \_\_\_\_\_

Lymph nodes: Sentinel

Right pelvic

Left pelvic

Optional – If involved – Macrometastases (≥2mm) / Micrometastases (2mm) / Isolated tumour cells (ITC)

Paraaortic

**IMPRESSION**

**FIGO (stage 2018)**

**TNM Stage (8<sup>th</sup> Edition): T N**

**Resident Pathologist**

**Reporting Pathologist**
