

Format for Reporting Histopathology- HYSTERECTOMY Specimen for Endometrial cancer

Name:Hospital I.D.no:

Report no:

Macroscopic Evaluation:

Specimen: Type : TAHBSO / TAHRSO / TAHL SO / TAH

Measurements: Uterus:....x...x...cms; Cervix.....cms

Tumour Location: Fundus / Body / Lower Uterine Segment

Tumour Size:

Tumour description:

Myometrial thickness (Max and Min):

Myoinvasion: NIL / Less than 50% / More than 50%

Serosa: Involved / Not involved

Tumour-Free Distance from Serosa (OPTIONAL):mm

Isthmus: Involved / Not involved.

Cervix: Involved/ Not involved

Vaginal cuff: (if present measurement) OPTIONAL

Right ovary: measures ____ X ____ X ____ cm ; Not Involved / involved

Right fallopian tube: ____ cm long ; _____

Left ovary: measures ____ X ____ X ____ cm ; Not Involved / involved

Left fallopian tube: ____ cm long ; _____

Right parametrium measures ____ X ____ X ____ cm and is not involved / involved.

Left parametrium measures ____ X ____ X ____ cm and is not involved / involved.

Omentum: Not present / Present ; If present- dimensions - ...x...x..cms; Not involved / involved-----

Lymph nodes:

Rt Pelvic [External Iliac, Internal Iliac, Obturator, Common Iliac] –

Number of nodes –

Dimensions –

Involved / Not involved

Lt Pelvic [External Iliac, Internal Iliac, Obturator, Common Iliac] –

Number of nodes –

Dimensions –

Involved / Not involved

Paraaortic

Sections code:

See Fim protocol(OPTIONAL)

Grossed by:

Microscopic Evaluation

Tumour type (as per WHO histological classification):

Tumour description (OPTIONAL)

Tumour Grade: 1/2/3

The tumour is limited to the endometrium.

Myoinvasion: Limited to endometrium with No myoinvasion / Invasion <50% / ≥50% invasion

OPTIONAL- percentage myometrial invasion

Uterine serosa: Not involved / Involved.

Tumour-free-distance to Serosa: Distance of tumour from the uterine serosa is _____ mm.(
OPTIONAL)

Lymphatic and Vascular Space Invasion (LVSI): Present / Not present

Perineurial invasion is seen/ not seen.(OPTIONAL)

Cervix: Not involved / Involved; If involved mention if tumour involves the cervical glands and / or stroma -----

Vagina: Not involved / involved
(OPTIONAL)_____

Adjacent endometrium: _____

Myometrium – additional findings : Leiomyoma / Leiomyomata / Adenomyosis / Polys

Right ovary: Not involved / involved; Additional findings _____

Right fallopian tube: Not involved / involved _____

Left ovary: Not involved / involved ; Additional findings _____

Left fallopian tube: Not involved / involved _____

Omentum: Free of tumour / Metastases present

Lymph nodes: Number of nodes – Free of tumour / Involved by tumour

Optional – If involved – Macrometastases ($\geq 2\text{mm}$) / Micrometastases ($< 2\text{mm}$) / Isolated tumour cells (ITC)

Peritoneal washings: Negative / Positive for Malignant cells

Any other comment:

Diagnosis:

FIGO stage

TNM Stage (WHO (FGT) 8th Edition): T N
